

04/25/09

The 2009 racing season got underway Saturday night and despite an added class this year, racing was completed before 10 PM.

Willis started the modified heat on the pole and jumped out to the lead. Charlie Wilson from Colorado overtook Willis and never looked back enroute to victory. Willis held off the rest of the field for an impressive 2nd place finish. Ashley started from the scratch position and drove the car smooth but cautiously in her first race in the new car.

Willis and Ashley both started from the rear for the main event. Willis struggled with the ill handling car the whole race and ended up in 6th. Ashley started from the back also and used the race for valuable seat time. The car isn't quite ready to keep up with the leaders yet, but it will get dialed in as the year goes on.
